ERASMUS+ STUDENT MOBILITY FOR STUDIES

- Erasmus+ student mobility is a program initiated to encourage students to explore different cultures, enhance their language skills, and gain international experience. Within the framework of this program, students have the opportunity to receive education for a specific period at an institution affiliated with their universities, located outside their home countries. Erasmus not only provides students with academic enrichment but also offers a socially and culturally enriching experience, contributing to their personal development. Consequently, students gain the chance to study in a different country, acquire an international perspective, and take steps towards becoming more effective individuals in the globalized world.

TRAVEL SUPPORT

- In addition to daily grant amounts, travel expenses are also covered. The amount of travel expenses is calculated using the “Distance Calculator” available at the link below:
<https://erasmus-plus.ec.europa.eu/resources-and-tools/distance-calculator>
- In order to contribute to the travel expenses of the students, the distance between the starting point of the mobility and the place where the activity takes place is determined and paid through the distance calculator provided by the European Commission. The grant equivalent of the kilometers calculated in the distance band calculator in the table below is the round-trip figure, which is not multiplied by two.

Distance	Standard Travel Grant	Green Travel Grant
Between 10-99 KM	28	56
Between 100-499 KM	211	285
Between 500-1999 KM	309	417
Between 2000-2999 KM	395	535
Between 3000-3999 KM	580	785

- As a general principle, for distances under 500 km, participants are expected to travel by low emission means of transport. Green travel is the use of public transport with low carbon emissions. The use of buses, trains and shared cars are included in the scope of green travel. In order to receive green travel support, green travel must be used on the way there and back and more than half of the entire trip must be made using green vehicles.
- Students/graduates may receive a **one-time additional grant of 50 Euros** if they choose eco-friendly travel.
- Individual support grants will be awarded for travel time before and after the activity, with a **maximum of two days for travel days** and **a maximum of six days** in case of green travel.
