ABOUT THE CLUB

Literature Club allows students to read books written in various periods, to express their opinions about the content of the books, and to broaden their horizons by looking at the points that cannot be seen from different perspectives.

The club commemorates the birth and death anniversaries of our poets, who have made a place in our memories with their works. Club members and students read and reflect on the poems authors wrote, and learn about their lives. We try to realize ourselves through literature and approach life from different perspectives. From time to time, we work in cooperation with various clubs, and we care about helping each other by organizing social responsibility projects.
